Description

Penblast 510M is an exterior rail car cleaner designed to remove tough soils. This organic acid based product will remove rust from stainless steel surfaces. *Penblast 510M* is concentrated, allowing for dilutions matched to the soils being removed.

Typical Use Directions (also see product label)

Add 1 part *Penblast 510M* to 10 to 40 parts water, depending on amount of soil and rust to be removed. Clean exterior of rail car using standard hand cleaning procedures or as applied through spray racks in a mechanically operated car wash. Car wash application involves spray rack application of cleaner at 50-125°F, followed by mechanical brushing and high-volume rinsing.

IMPORTANT: Before using *Penblast 510M*, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS.
