

CELL-KLEEN™ HD1

Deep-Cleaning Anilox Roll Cleaner

FEATURES/BENEFITS

Features

Clings to vertical surfaces
Biodegradable (after soil release)
Safer than conventional solvents
High flash point: none to boil
(COC)

Pleasant odor

Deep cleans

Benefits

Economical: 1 gallon cleans up to
10 rolls
Cost and labor reductions
Improved print quality
Extended roll life
Safer to use
Leaves no film or residue after
rinsing

CELL-KLEEN HD1 is available in
6 gallon pails, 55 gallon drums, totes
and bulk deliveries.

Description

CELL-KLEEN HD1 is a viscous, biodegradable solvent cleaner designed to deep clean water-based inks from anilox rolls. Because of its thixotropic properties, CELL-KLEEN HD1 can be applied either on press or off and will allow for increased dwell time on the roll without dripping down onto other sensitive press components. CELL-KLEEN HD1 will penetrate deeply into the cells and clean them like never before. By using CELL-KLEEN HD1 to routinely clean anilox rolls, the frequency with which rolls need to be sent out for reconditioning will be greatly reduced and print quality will be greatly improved.

Directions for Use

Apply CELL-KLEEN HD1 with a brush or coarse spray and let dwell for 15 to 30 minutes. In a very short time you will see the ink rising to the surface. Some agitation with a stainless steel or brass brush may be required depending on soil conditions. Thoroughly rinse with water, or remove with a clean, damp rag if cleaning is being done on press.

IMPORTANT: Before using CELL-KLEEN HD1, always be sure to read and follow precautions and directions on the product container label and MSDS.
