

PENPOWER 300L

Water Soluble Oil Absorbent

FEATURES/BENEFITS

Features

- Low foaming
- Biodegradable
- Non-flammable
- Absorbs oils and greases
- Rinses easily - leaves floors non-oily
- Provides positive walking and vehicular traction

Benefits

- Reduces costs - no sweeping, shovelling, drumming or cartage
- Makes instant solution with cold or hard water
- Drains kept free flowing, no clogged sumps or sump pumps
- Superior cleaning and soil suspending properties

Penpower 300L is available in 180 and 450 lb. drums.

Description

Penpower 300L is a structured granular powder which absorbs residual oil, provides good traction for walking or vehicles, and then permits water rinse-off into drains. Dissolving completely in cold or hot water, *Penpower 300L* suspends an exceptional quantity of oils and greases and easily moves them off of floors.

Noncaustic, biodegradable *Penpower 300L* is a proven product, possessing ecological as well as economic advantages over the old, familiar and messy inert oil absorbents which clog drains and must be picked up by hand. With *Penpower 300L*, there are no added labor charges for shoveling and drumming, as well as no cartage and haul-away costs.

Directions for Use

Spread *Penpower 300L* over oily and greasy floors. *Penpower 300L* can be sprinkled by hand (wear rubber gloves) or applied with a rotary-type garden spreader. Floor now has good grip action . . . oil has been absorbed. When area permits, flush directly into closest floor drain using a water hose. Entire area, including oily sections and run-off system, is oil free and clean. Standing machinery need not be moved since *Penpower 300L* is safe on most metals.

IMPORTANT: Before using PENPOWER 300L, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS. (Sep06)
