

GENERAL PRODUCT

GERM WARFARE II[®]

Concentrated Germicidal Detergent

FEATURES/BENEFITS

Features

- One step cleaning and disinfecting
- Triple-phenolic germicidal system
- Hard water tolerant
- Effective at 1/2 ounce per gallon of water (1:256)
- Safe on most surfaces

Benefits

- Decreases labor costs
- Kills a broad spectrum of organisms including HIV-1
- Very economical
- One product for multiple uses

EPA Reg. No. 49403-23-52

Germ Warfare II is available in
4 x 1 gallon cases and 55 gallon drums

Description

Germ Warfare II is a highly concentrated germicide/detergent formulated to disinfect and clean environmental surfaces in one operation.

Germ Warfare II contains a triple phenolic system, considered more effective than mono-phenolic systems, and destroys a broad spectrum of micro-organisms.

Germ Warfare II maintains its germicidal activity in hard water (up to 400 ppm).

Germ Warfare II is typically used for disinfecting and cleaning floors, walls, equipment, washrooms, fixtures or any hard surface not harmed by ordinary water.

Germ Warfare II, when used as directed, will not harm washable painted and varnished surfaces, resilient floors, terrazzo or metal surfaces.

Typical Use Directions (also see product label)

Recommended Dilutions: For cleaning and disinfecting with *Germ Warfare II*, use 1/2 ounce per gallon of water (1:256).

For Heavy Duty Cleaning: Use 2 ounces per gallon of water.

For General Cleaning and Disinfection in Hospitals, Operating Rooms and Nursing Homes, Including Tuberculous Areas: Remove heavy soil and thoroughly wet surfaces with *Germ Warfare II* solution. Scrub or mop in usual manner.

NOTE: See product label for specific organism information.

IMPORTANT: Before using *Germ Warfare II*, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Apr04)
