Description

Pensolv L1009 was developed as an environmentally improved replacement for mineral spirits. *Pensolv L1009* lacks the aromatic hydrocarbons that are often present in other similar products. The levels are less than 100 ppm total aromatics and less than 1 ppm benzene, values that yield regulatory benefits without affecting cleaning performance. *Pensolv L1009* contains no photochemically reactive materials.

Use Directions

General cleaning: *Pensolv L1009* is to be used full strength. It can be applied by non-atomizing coarse spray. Other application methods may be used, including brushing it on or dipping parts into the solvent. After application and a brief soaking period, blow surfaces dry with compressed air. No water rinse is needed.

NOTE: Use full strength; do not dilute with water. Safe for use on all metals. May be used on some plastics. *Note: This product may craze or soften certain plastics and may affect certain paints. Pretest on part to be cleaned before use. If this product is used to clean electrical equipment such as motors, junction boxes, contacts, etc., all sources of electricity must be disconnected before cleaning.*

IMPORTANT: Before using *Pensolv L1009*, always be sure to read and follow warnings and directions for use appearing on the product container label and MSDS.
