

LUBRISIL-OS

Precision Cleaner & Silicone Lubricant

FEATURES/BENEFITS

Features

- Excellent cleaner
- Residual lubrication
- High dielectric voltage
- Water displacing
- Condition O rings
- Lubes stuck switches
- Lubes window tracks
- No flashpoint
- 60°F to 400°F use range

Benefits

- Removes contaminants from electrical switches
- Switches move smoothly
- No electrical shorting

Lubrisol OS is available in cases of 24 x 12 oz. aerosol cans.

Description

Lubrisol OS is a maintenance cleaner/lubricant with multiple uses. The cleaning is accomplished by a solvent with no flashpoint allowing use in areas where sparks or heat may be present. The solvent removes oils, greases, dust, and hydraulic fluids that build up on electrical and non-electrical switches in an industrial environment.

The silicone lubricant is carried into remote non-visible locations by the solvent and aerosol propellant where it remains after the solvent has dried. *Lubrisol OS* will displace moisture and leave a film of non-corrosive silicone lubricant.

The lube film is inert, odorless and colorless.

Use on:

- Electrical switches
- Diaphragms
- Adjusting screws
- Control switches
- Ceramic insulators
- Doors and Windows

IMPORTANT: Before using LUBRISIL-OS, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Mar04)
