

PENETONE AIR BLAST™

Keyboard Cleaner & General Purpose Duster

FEATURES/BENEFITS

Features

- Zero ozone depleting potential
- Passes flame extension test
- Zero residue
- Non-abrasive
- High-powered HFC gas

Benefits

- Prevents failure caused by airborne particles
- Very high volume of gas per can
- Hundreds of uses

PENETONE AIR BLAST is available in cases of 24 x 10 oz. (281 gm.) aerosol cans.

Description

PENETONE AIR BLAST is a pressurized gas intended to blow off dust and similar airborne contaminants that accumulate in difficult industrial environments and interfere with or disrupt operations.

Typical Uses

- Sensitive surfaces
- Delicate components
- Precision electrical devices

PENETONE AIR BLAST is safe to use on metal, glass and most plastic surfaces (pretest on plastic surfaces before use).

Directions for Use

1. Can must be held upright when spraying. Do not agitate or invert can beyond 40 degrees while using.
2. Remove tamper-resistant tab on top of activator.
3. Hold can upright and spray three to four inches from surface.
4. For pinpoint application, use extension tube.

IMPORTANT: Before using PENETONE AIR BLAST, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Sep06)
